Rally through the *Gréiweschlass*

Find the right key to open the mysterious chest! Enter the numbers on the last page to work out the number of the matching key.

Mission 1

At the entrance to the castle, you will find an archway. You can see a year at the top of the archway.

Write the year here on the right and enter the marked number in the key calculation.

Mission 2

Find the administrator's house.

Take a good look at the facade and find the mistakes in the picture on the right. How many are there? Fill in the number.

Mission 3

The castle used to be protected from intruders by a grid.

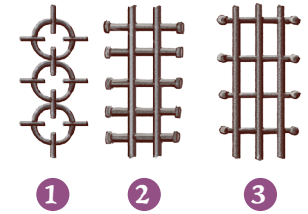

Connect the dots in the grid one after the other and find out which number is hidden here. Fill in the number.

Mission 4

Find the kitchen on the map. In the kitchen you will see a small window where the sink used to be.

You can still see the holes in the window where the grille was attached. Which grille fits into the window? Fill in the number.

Mission 5

Look for the chapel tower on the map and go there. On the first floor there was a cozy room with a fireplace. The chimney is still on the top of the wall, but the floor has disappeared.

You can see three cups on the chimney. Which cup on the picture on the right is invented? Fill in the number.

Find the right key!

Do the calculations! The result will show you the correct key to open the mysterious chest!
